PRESERVED TREES

All trees 2 caliper inches or larger, including palms with 6 feet or more of clear trunk, preserved on-site will count toward compliance for Charlotte County's tree point requirements. The following conditions for replanted trees must apply:

**While all preserved native palms may be counted toward a development's tree point requirement, no more than twenty-five (25) percent of the required tree points may be obtained from planted native or non-native palms.**

**No more than fifty (50) percent of the required tree points may be obtained from approved non-native trees except that non-native palms shall not count for more than twenty-five (25) percent of total required points per section 3-9-100.3(c)(4).**
